

#### Biographical notes:

Niki Gaitani graduated from the Physics Department of the University of Athens, Greece and received her MSc degree on Environmental Physics. She is a PhD student at the Department of Environmental and Natural Resources Management of the University of Ioannina, specializing in 'Energy rating and environmental quality of buildings'. In parallel, she is currently working as a research scientist in the Group of Building Environmental Studies (University of Athens) and has participated in a variety of national and European research and applied projects in energy conservation, integration of renewable energies in buildings, indoor air quality, thermal comfort, passive cooling and urban planning. Her technical skills include experimental testing, measurements and dynamic thermal modeling.
